

persimmon leaves is boiled in water for a few minutes. Then, both of them are mixed and concentrated under stirring to give the objective smoking-giving up candies. For example, thick malt syrup (120g), seeds of cape jasmine (16), water (800cc) and persimmon leaves (10g) are used to give 40 candies. When eating candies about 10 drops a day, one can gradually decrease smoking, leading to no smoking in a week to a month.
